Background
The School Physical Activity Policy Assessment (S-PAPA) assesses physical activity policy related to physical education, recess, and other physical activity opportunities at elementary schools. It uses open-ended, dichotomous, multichotomous, and checklist formatting and has 7 background items and three modules: (a) Physical Education (40 items); (b) Recess (27 items), and (c) Other Before, During, and After School Programs (15 items). Test-retest results suggest SPAPA items are reliable and can be useful in assessing PA policies in elementary schools (Lounsbery et al., 2011). Total administration time for all three modules is approximately 23 minutes.

Acknowledgements
The development of S-PAPA was supported by a grant (#67113) from Active Living Research, a national program of the Robert Wood Johnson Foundation.
