Urban Environments and Physical Activity of School Journeys Among Children in City of Turku, Finland

*"When I walk from school to home,
it is easy to breath and there are no
human voices.*

*Normally I am there alone –
I only hear the voices of the birds."*

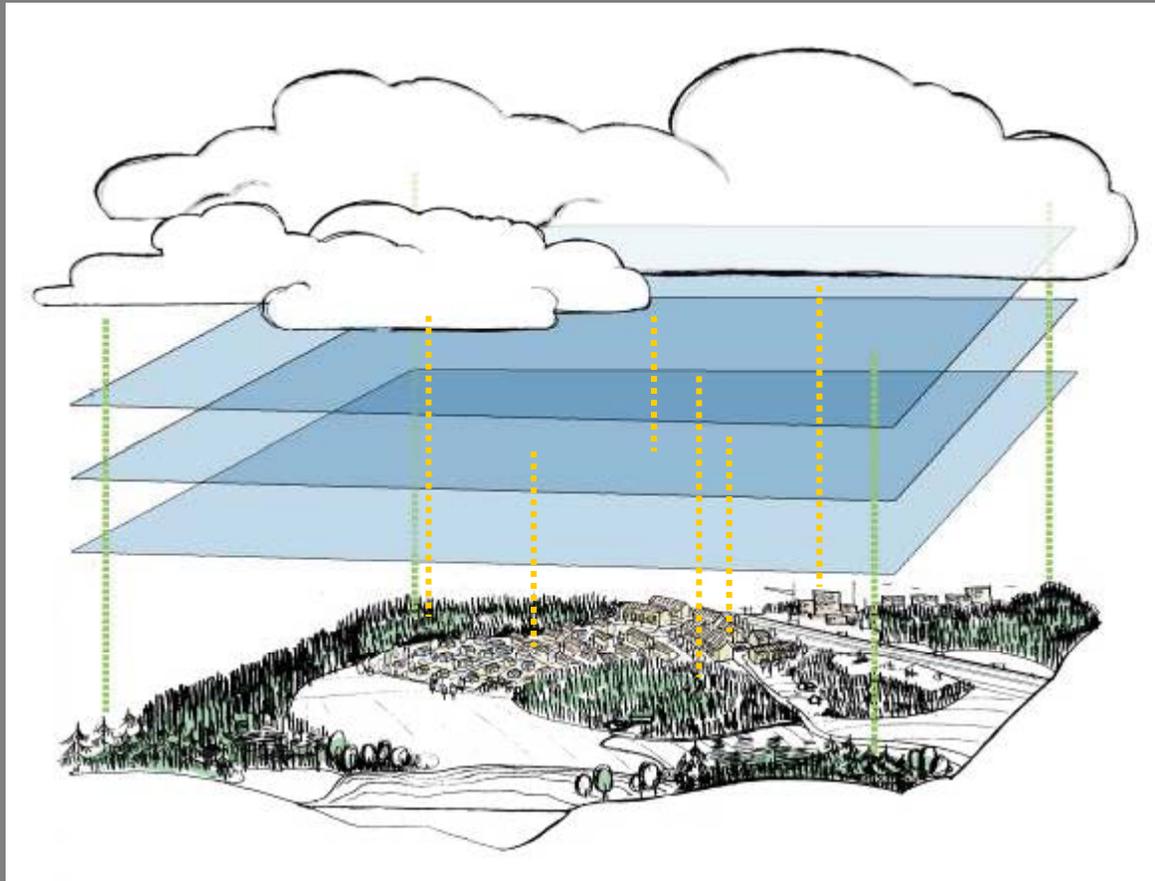

Anna Broberg

WHO's questionnaire

Mobility

Hillman et al. 1990

1. How are you mostly going to school this week?

I go to school...

- On foot
- By bicycle
- By bus
- By car
- Other: _____

I go home from school...

- On foot
- By bicycle
- By bus
- By car
- Other: _____

2. Is there something on your way to school that bothers you or scares you?

- Cars
- Mopeds or scooters
- Cyclists
- Walking alone
- Grown-ups
- Older children or young people
- Dogs or other animals
- Darkness
- I don't know
- Other: _____

3. I'm allowed to go alone...

- To school
- Home from school
- To my hobbies
- Outside after dark
- On bicycle
- On public transport
- To cross big streets
- I don't know

Finding your home

You should be able to see your school on this map.

First, use the small map to find the area where your home is, then drag the house shown below to where your home is.

Next find your home - either use the map of all of Turku or the one showing the centre of town - and drag the house shown below to where your home is.

Use the arrows on the sides of the map to move in the direction you want to go. Use the + and - buttons to zoom in or out on the map.

Please tell us this first:

Your age: years old

Your gender: girl boy

What kind of house do you live in:

a one-family house a block of flats a terraced or semi-detached house

Does your family have a car? yes no

Pick your school from the drop-down menu:

Pick your school here

How does Turku feel?

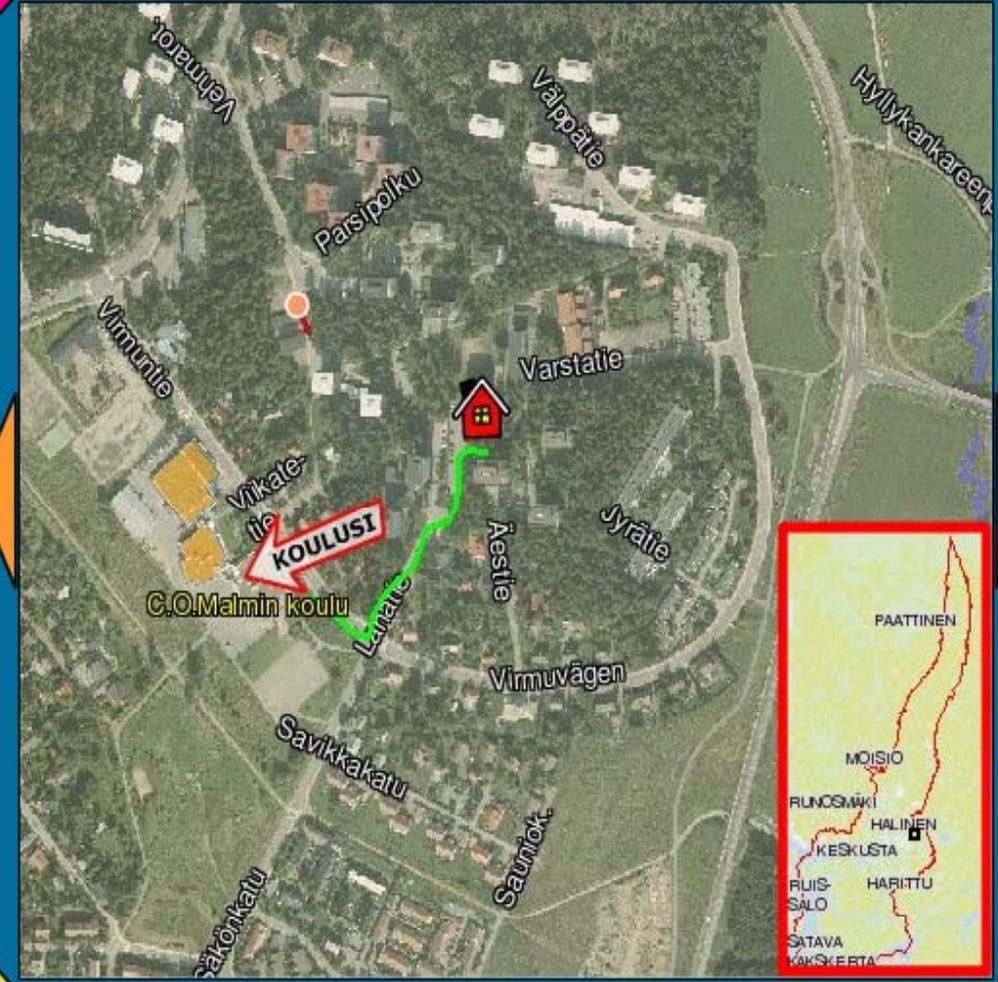

Think about how different places feel to you. You can mark each place on the map up to 3 times. Click on the ball, drag it over the map and let go. When you have finished marking,

- unsafe
- boring
- bad air to breathe
- noisy
- dirty
- dangerous
- dark
- beautiful
- clean
- exciting
- good air to breathe
- ugly
- safe
- calm
- quiet
- a good place to be
- my own!

Well-being survey

Your height and weigh What is your opinion of your health?

Height cm

Weight kg

- It is
- very good
 - quite good
 - average
 - rather bad
 - I don't know

Is there something that stops you from moving

- no
- yes, what:
- I don't know

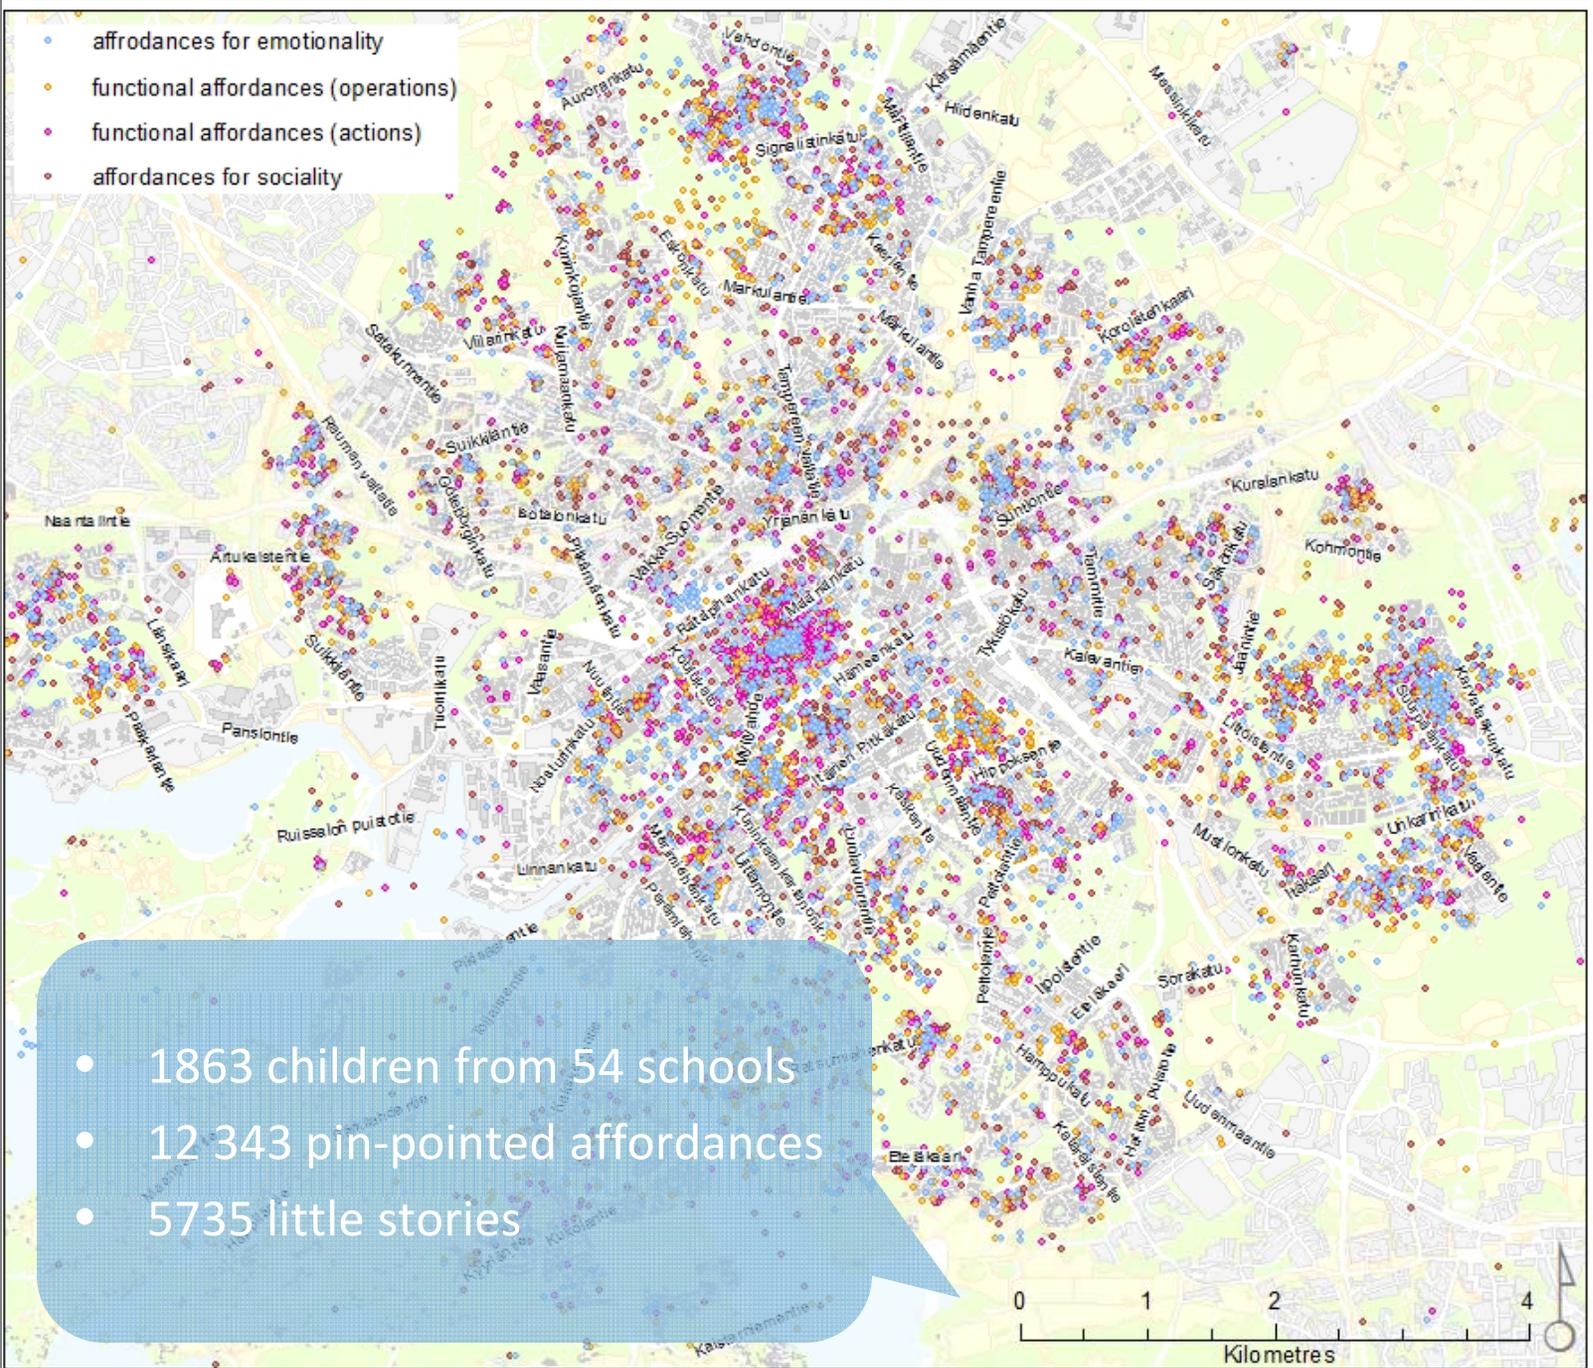

During the past SIX MONTHS, have you had any of the following symptoms and how often? Please answer each question.

	Seldom or never	About once a month	About once a week	Almost every day	I don't know
Neck or shoulder pain	<input type="radio"/>				
Low back pain	<input type="radio"/>				
Abdominal pain	<input type="radio"/>				
Being strained or nervous	<input type="radio"/>				
Being irritated or angry	<input type="radio"/>				
Having difficulties in sleeping	<input type="radio"/>				
Headache	<input type="radio"/>				
Being tired, weak or feeling faint	<input type="radio"/>

The data gathered in Turku

Child-based analysis

URBAN STRUCTURE VARIABLES

- Density
- Green structure
- Proportion of children

EXPERIENTIAL/ BEHAVIORAL FACTORS

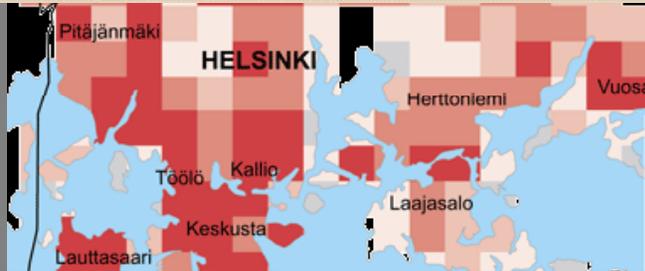

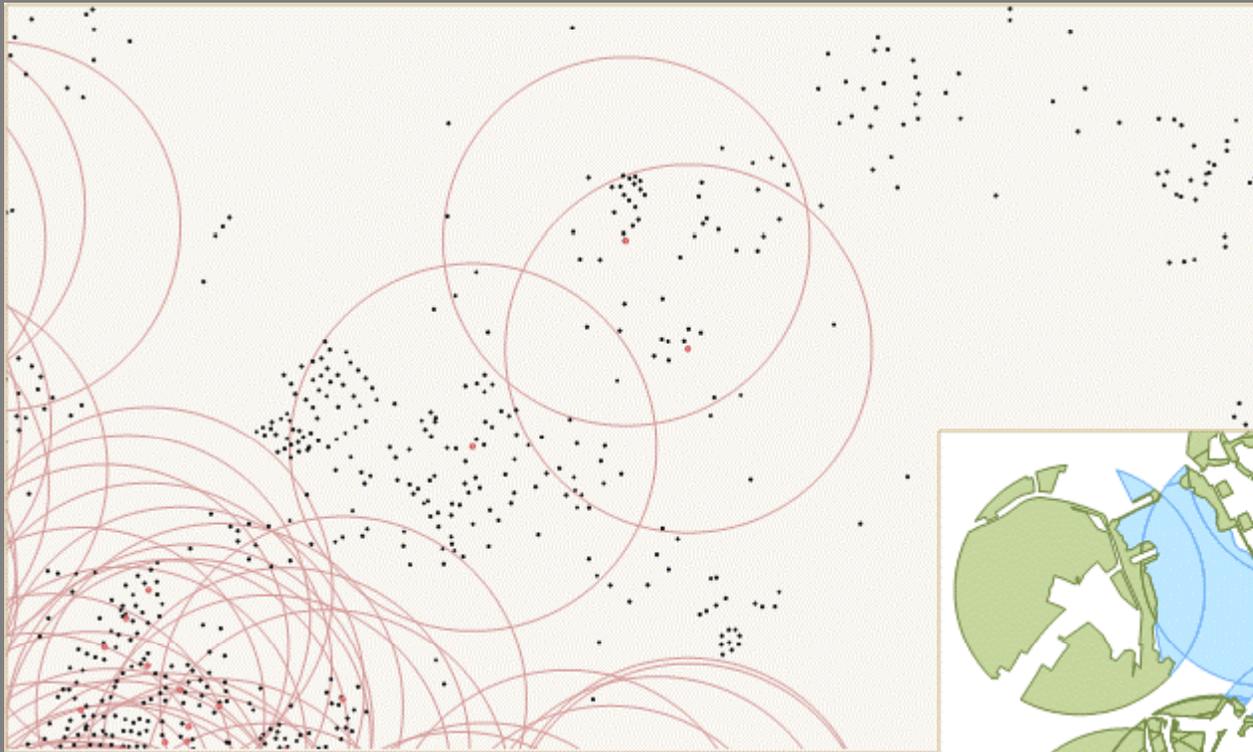

- Mode of school journeys
- Mobility licences
- Distance to affordances
- Diversity of affordances
- Perceived dangers
- Preference index

HEALTH & WELL-BEING

- BMI
- Daily symptoms
- Perceived health

The individually sensitive analysis of urban structure

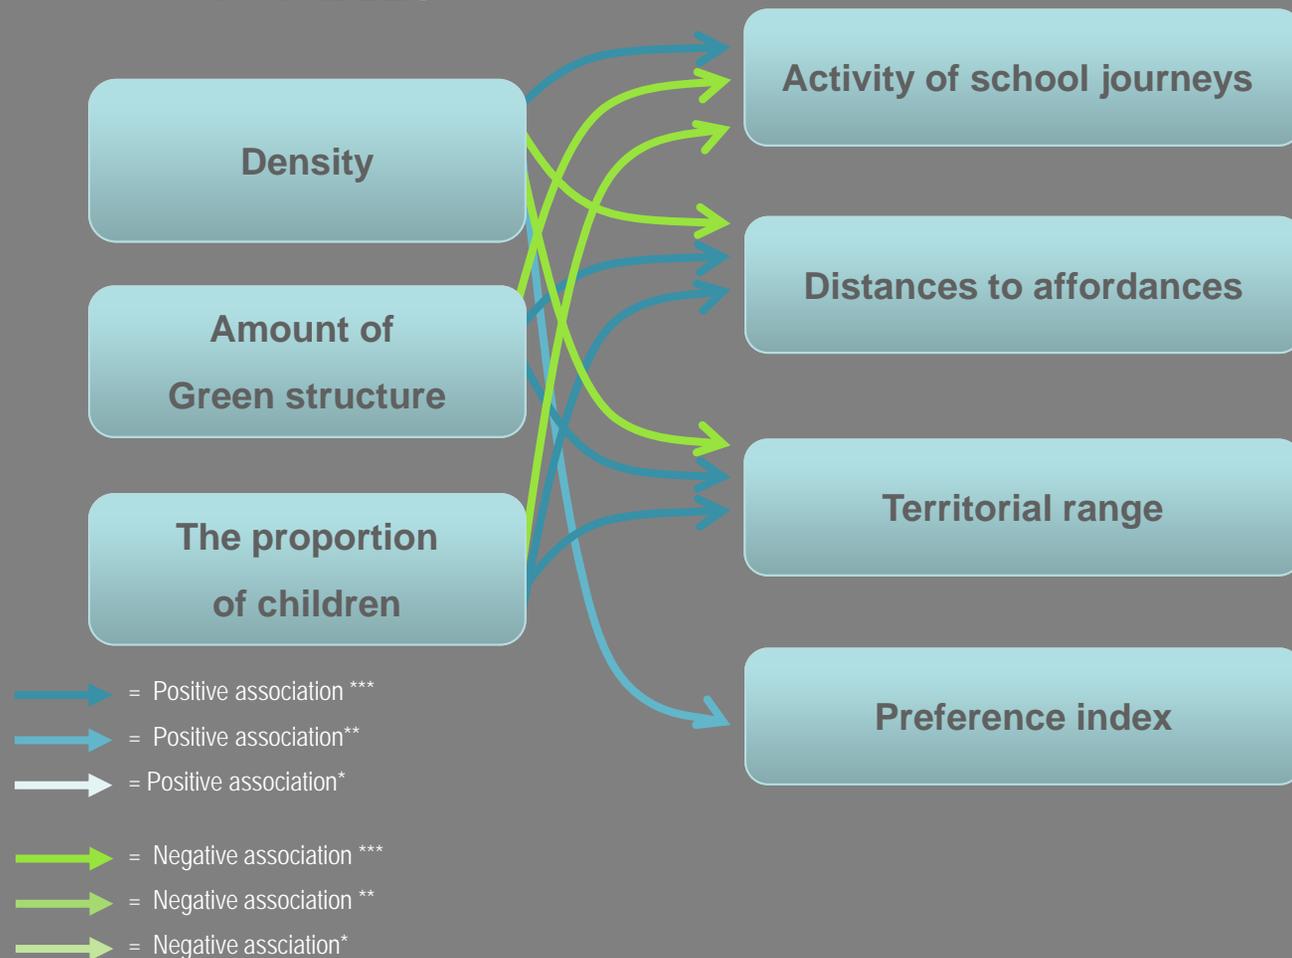

(500 m buffer around inhabitant's home)

Urban structure & children's experiences and behavior

URBAN STRUCTURE VARIABLES

EXPERIENTIAL & BEHAVIORAL FACTORS

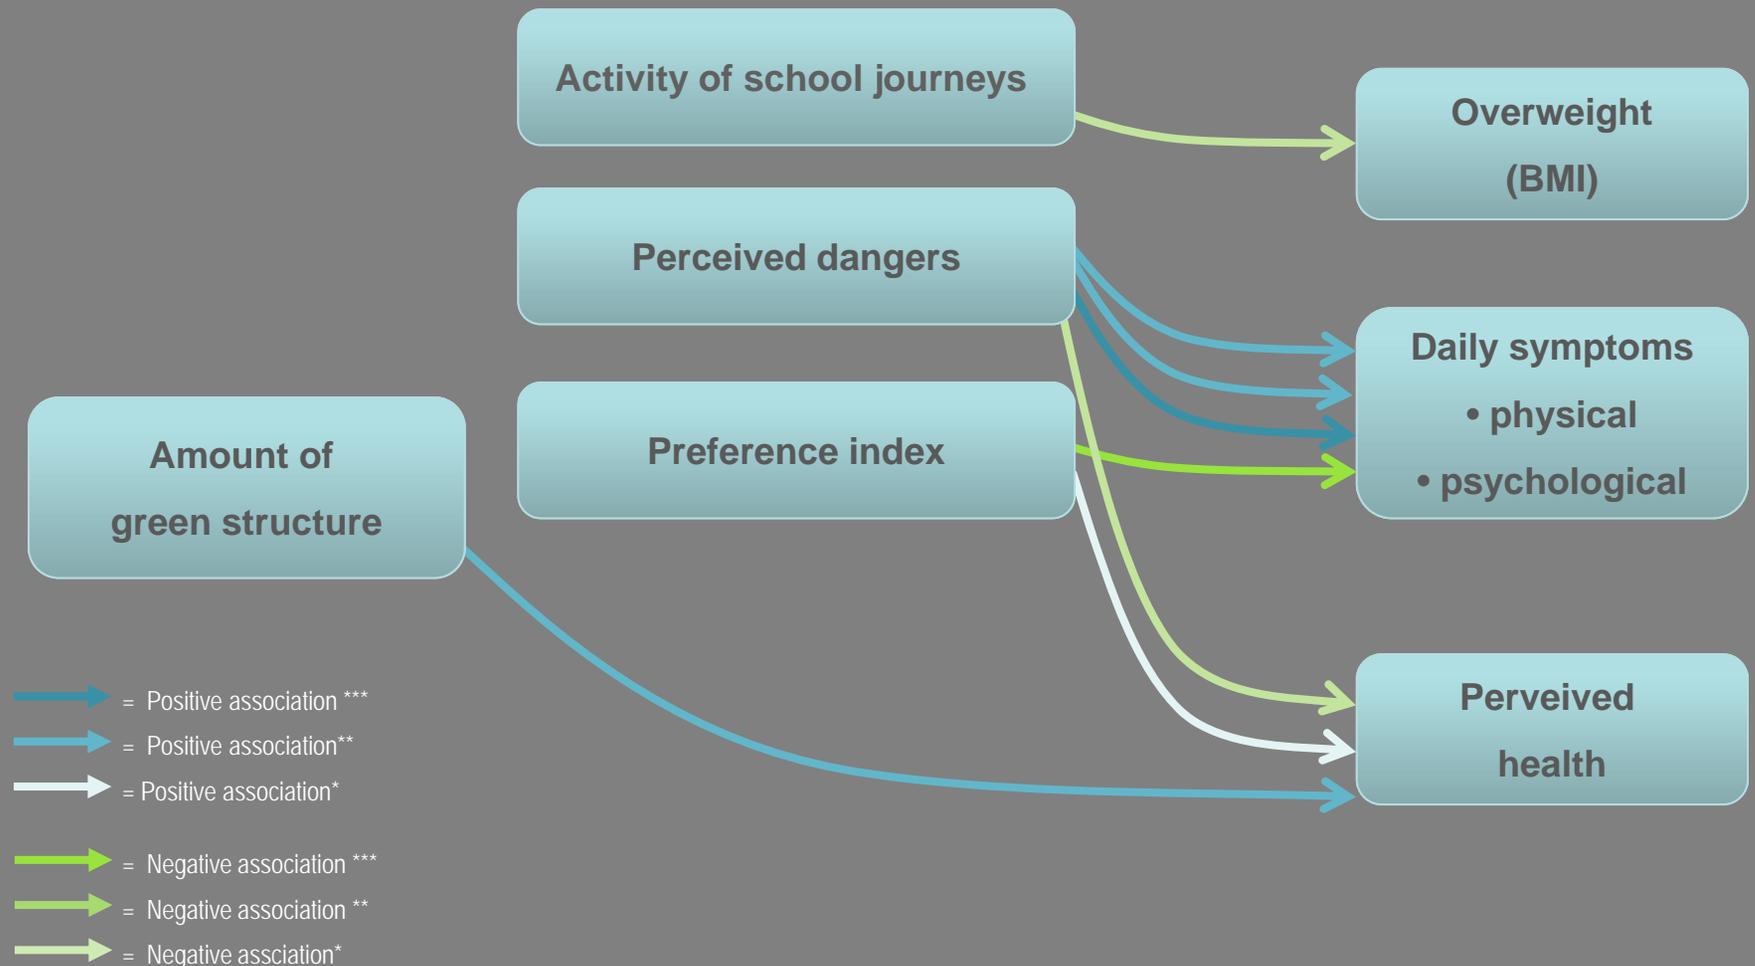

Factors that predict perceived health and wellbeing

URBAN STRUCTURE VARIABLES

EXPERIENTIAL & BEHAVIORAL FACTORS

PERCEIVED HEALTH & WELLBEING

Affordance-centered statistical analyses

The denser the immediate surroundings of an affordance are (50 m buffer) the likelier it is that the place is reached independently

The amount of population around an affordance increases the degree of liking especially on affordances for sociality.

The amount of green space around an affordance increases the degree of liking especially on affordances for emotionality.

Lorem Ipsum

Voit merkitä kartalle suojeltavia, kohennettavia tai poistettavia kohteita sekä merkitä talojen, viheralueiden tai reittien lisäyksiä ympäristöön.

- Säilytettävä kohde
- Kohennettava kohde
- Poistettava kohde

Children's everyday mobility,
health & urban structure
six neighbourhoods in Helsinki
www.pehmoGIS.fi/helsinkilapset

A young child with dark hair, wearing a bright yellow hooded raincoat over a dark shirt, is looking upwards with an open mouth as if speaking or shouting. The child is positioned in the lower-left foreground. The background is a faded, grayscale image of a multi-story building with many windows, suggesting an urban or institutional setting. A large, blue, rounded rectangular speech bubble points from the child towards the upper right, containing white text. The overall composition is set against a dark gray background on the right side.

*Wouldn't it be something if my
small voice would make
a difference in the planning of
my environment!*

Thank
you!
