

# The Public Health Roots of Zoning and Modern Land Development Codes

## *In Search of Active Living's Legal Genealogy*

**Joseph Schilling, JD, LLM**

Director of Community and Economic Development  
International City/County Management Association

**Leslie S. Linton, JD, MPH**

Deputy Director, Active Living Research  
San Diego State University

# Today's Game Plan

- The scope and goals of our paper
- Land use codes / regulations as barriers to active living
- Public health as legal foundation
- Evolution of public health concerns / have land use codes kept pace?
- Results to date – charted “genealogy”
- Next steps and legal/policy implications

# Scope and goals of our research

- Scope:
  - Investigate and describe underlying public health basis for zoning and other land development codes;
  - map the relationships as a “genealogy”
- Goals:
  - Provide legal rationales for reforming zoning and existing land development codes
  - Build the legal case for code reform
  - Reinforce the legal foundations for active living

# Our Research Plan

- Identify/ describe the barriers that zoning and other state and local land development codes (LDCs) create for Active Living
- Examine historical parallels of planning & public health issues
- Search case law, briefs, legal treatises, and law reviews for the common public health influences on zoning and LDC
- Mapping a genealogy framework
- Highlight model codes and best practices

# Zoning and Land Development Codes

- Land development codes – (umbrella term) government controls or policies that affect the use / development of land, associated structures, and public infrastructure
- Zoning – local statutes that establish land use districts for residential, commercial, industrial and agricultural activities, and usually prescribing standards w/in districts for building height and bulk, setbacks from lot lines, and density or intensity of the use of individual lots w/in the district
- Other LDC's – subdivision regulations, impact fees
- Building and Housing Codes
- Engineering Standards
- Architectural and Design Guidelines

# The Impact of LDC's on Active Living

*Attributes of built environment (examples)*

*LDC's (examples)*

- Mixed land use
- Density
- Street Connectivity
- Pedestrian infrastructure
- Access to public and recreation facilities
- Aesthetics

Zoning, subdivision regulations and codes

Zoning

Engineering standards, transportation plans, zoning

Engineering, street & sidewalk standards

General / comprehensive plan and community plan, impact fees, dedication requirements, zoning

Architectural & design guidelines, zoning

# America Moves to the Suburbs

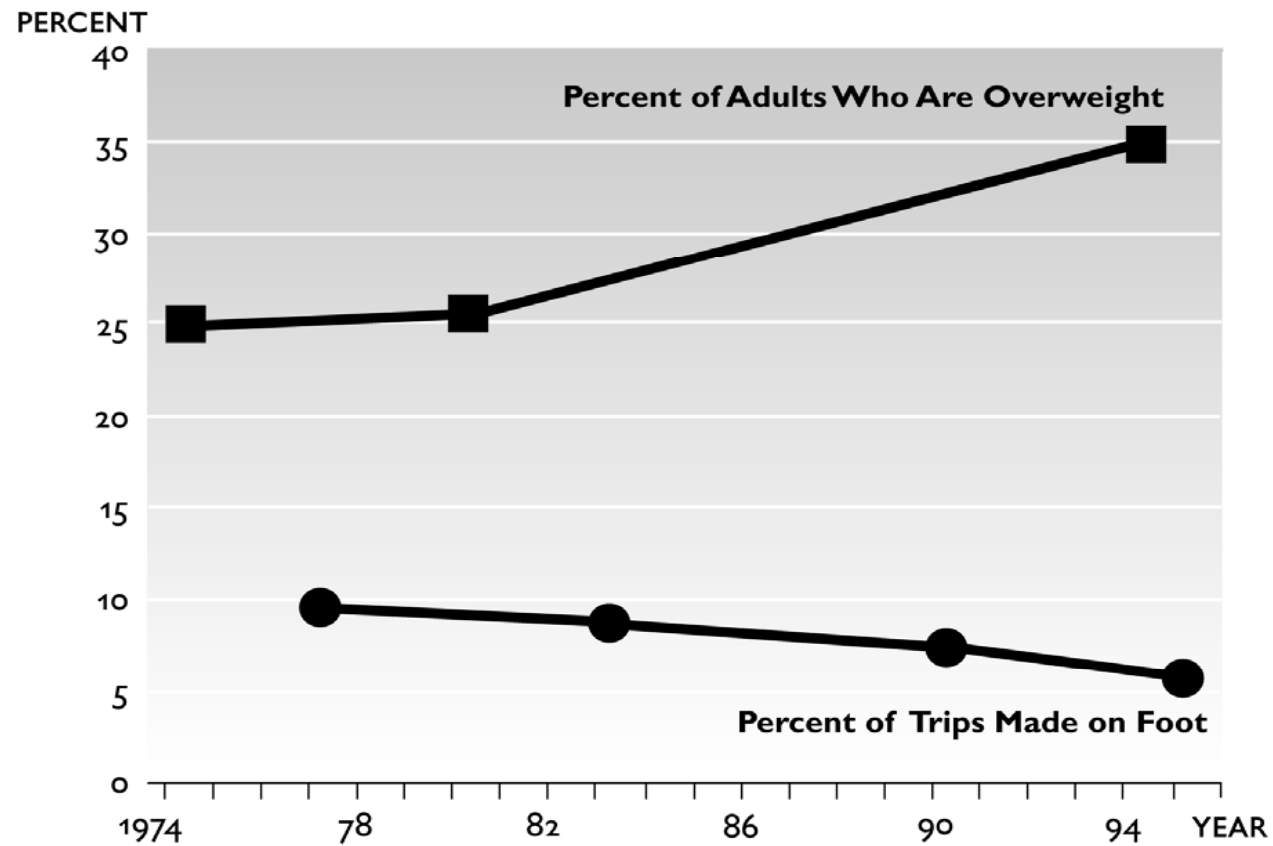

Figure 1-15.  
Percent of Total Population Living in Metropolitan Areas and  
in Their Central Cities and Suburbs: 1910 to 2000

Source: U.S. Census Bureau, decennial census of population, 1910 to 2000.

Hobbs & Stoops, Demographic Trends in the  
20<sup>th</sup> Century Nov. 2002, US Census website

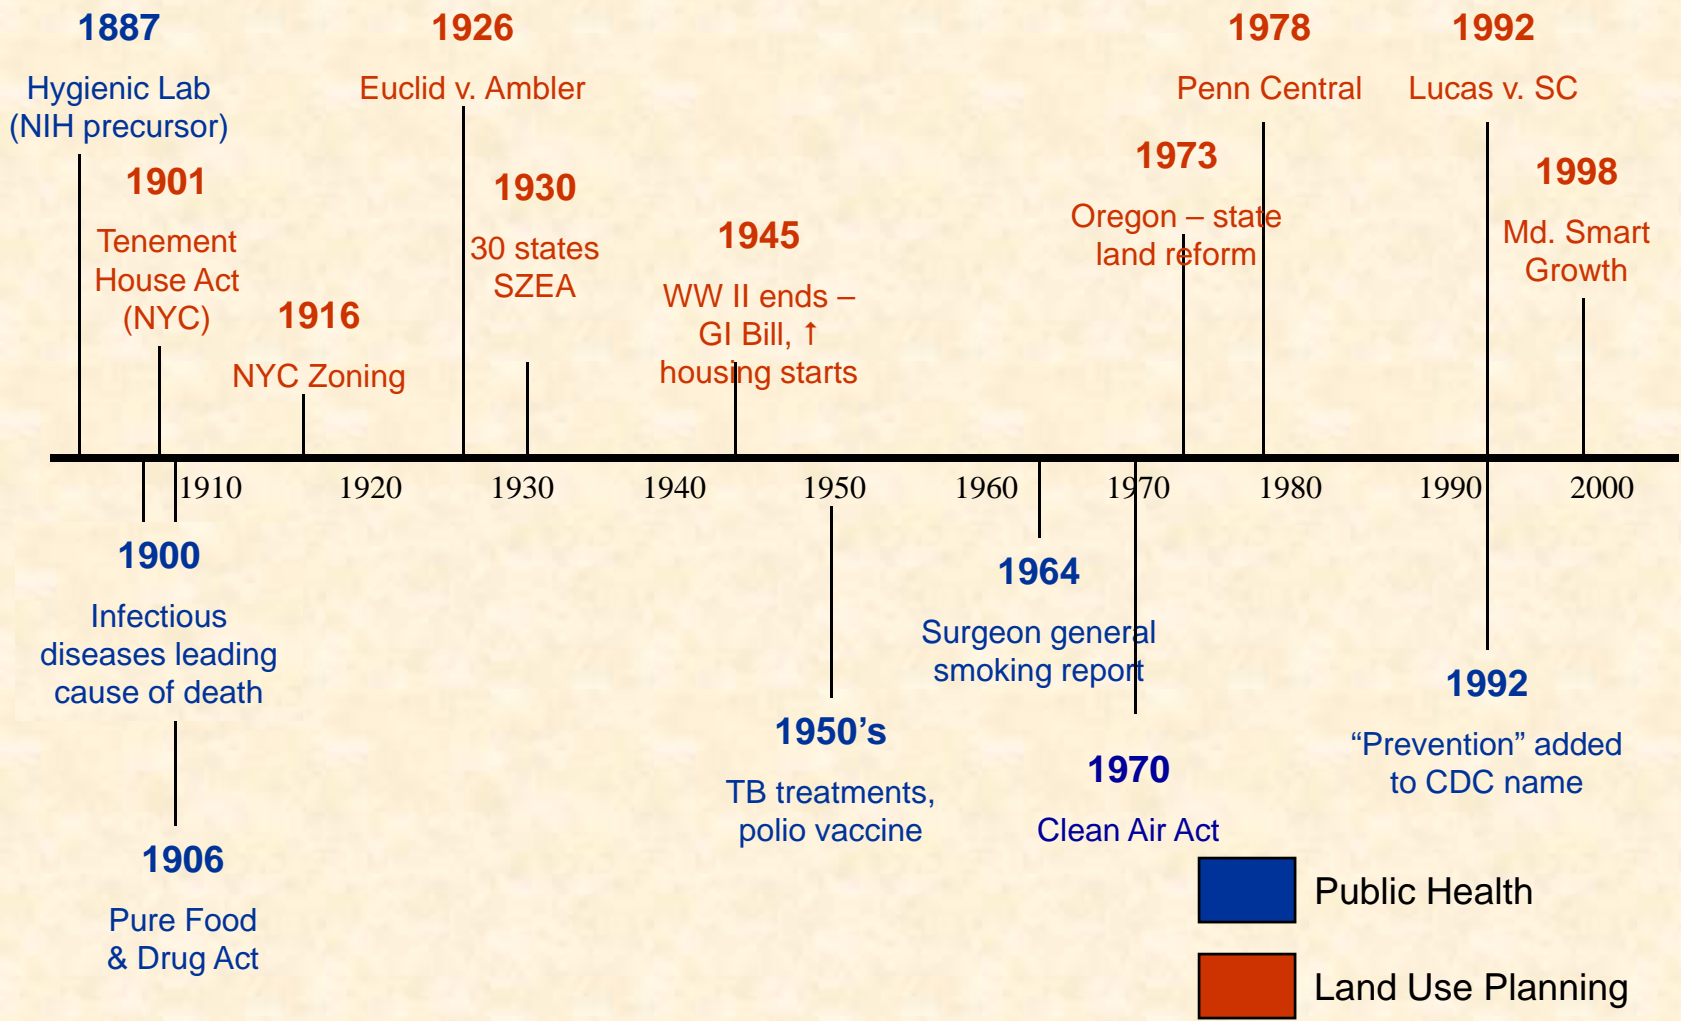

# Walking trips decline

# Public Health and Land Use Planning Timeline

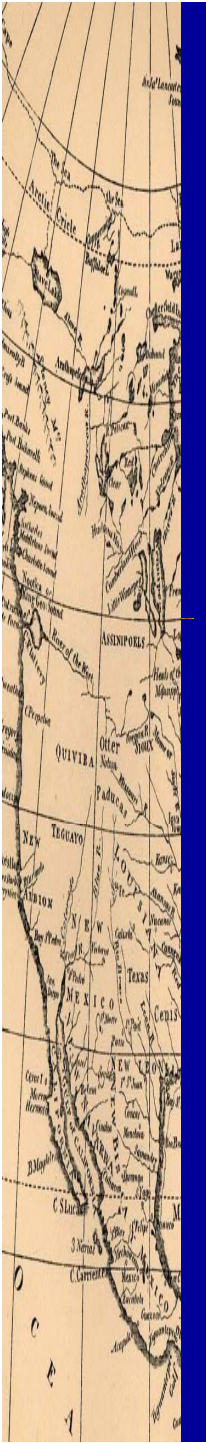

# Legal Ancestors

# Land Use Powers Genealogy

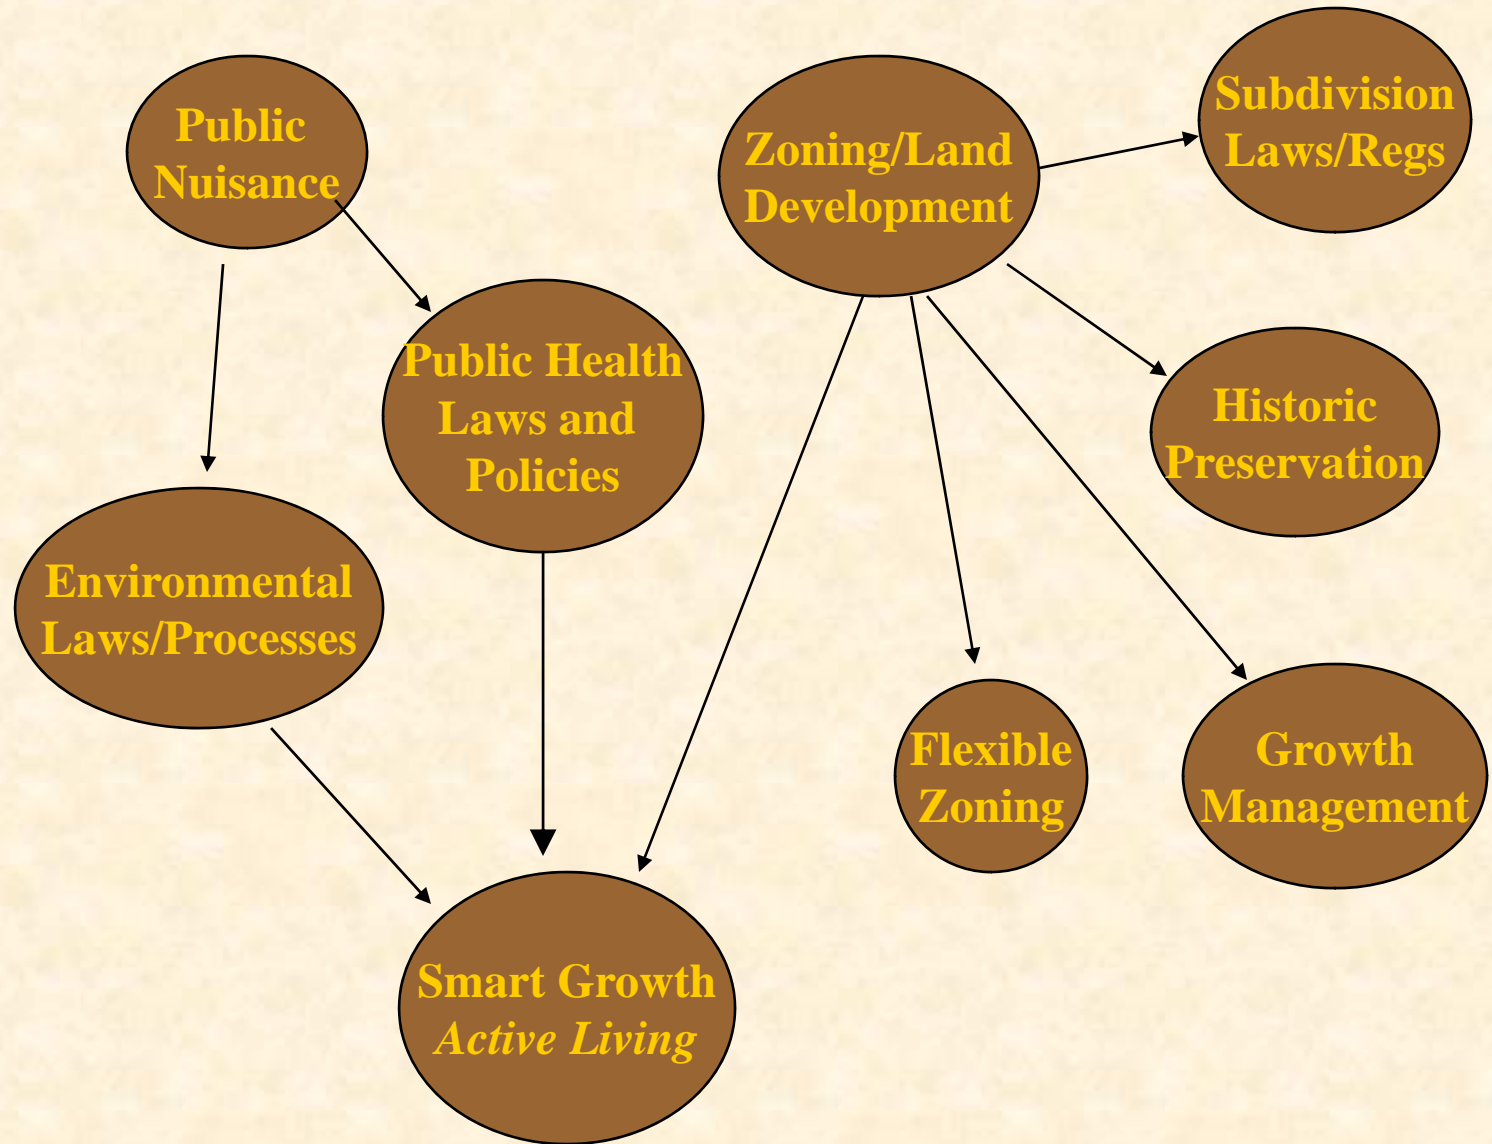

# The Euclid Split

## *Euclid vs. Amber Realty (1926)*

- Inner ring suburban community
- Case of first impression for Sup. Ct.
- State court decisions favor zoning
- Supreme Court's rationale:
  - Approve as proper exercise of police powers
  - Preserve single family character
  - Protect property owner investment

# Active Living's Legal Foundations

A vertical strip on the left side of the slide shows a historical map of the Americas, including parts of North and Central America. The map is detailed with geographical features, city names, and a grid of latitude and longitude lines. It has a sepia or aged paper tone.

# Start Growth/New Urbanist Alternatives

- Focus on building form and building type
- Encourage a mix of uses and housing types
- Encourage more attention to streetscape and the design of the public realm
- Focus on compact communities that are friendly for the pedestrian and bicyclist

# Trends Towards Code Reform

- Greater Awareness/Code Reform is a hot topic
  - Conferences and workshops
  - Publications
- APA's Growing Smart Initiative
- Duhaney's Smart Code
- Katz' Form Based Code
- Pioneering cities willing to tackle code reform

# Conclusions, Trends & Next Steps

- Integration of Active Living Principles into Smart Growth Policies/Programs
- Reform of Zoning and LDCs
- Crafting Legal Rationales
- Test/Refine our Preliminary Framework
- Additional Legal and Policy Research
- Collect and Share Best Practices
